-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The previous requirement for restriction is vacated in response to Applicant's suggestion that the claims be grouped differently. A new requirement for restriction is established in the instant Office Action.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 4-7, 11-12, 17-20, 24 and 29-30, drawn to a system, apparatus and method for configuring network device using secure e-mail, classified in class 709 subclass 206, 220.

II. Claims 2-3, drawn to a method for using markup language for configuring network devices, classified in class 709, subclass 220 and class 715 subclass 513.

III. Claims 8-10, 13-16, 21-22, 2-27 and 31, drawn to an apparatus for firewall authentication, classified in class 709, subclass 220 and 709/226.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as sending an encryption configuration file over network via email of the like and decrypt the configuration for configuring network devices at the destination; invention II has separate utility such as sending markup language or XML to configure network devices; invention III has separate utility such as

Art Unit: 2143

sending a mail message for electronic transmission include IP address for authentication through a firewall. See MPEP § 806.05(d).

4. Claims 1, 11, 18, 22 and 29 links inventions I-III. The restriction requirement between the linked inventions is subject to the non-allowance of the linking claim(s), claims 1, 11, 18, 22 and 29. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. In re Ziegler, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for each of Groups I-III is not required for each of the other Groups, restriction for examination purposes as indicated is proper.

Art Unit: 2143

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bunjob Jaroenchonwanit whose telephone number is (703) 305-9673. The examiner can normally be reached on 8:00-17:00.
